

TOWNSHIP OF EDWARDSBURGH CARDINAL

Dundas Street Engineering Design

RFP-EC-ES-25-04

ADDENDUM NO.4

TENDER ISSUED: March 7, 2025

This addendum has been issued on March 26, 2025 to summarize and answer questions received since March 25, 2025.

1. Does the scope of work include a traffic study to assess traffic patterns and develop recommendations for changes to the intersections and/or roads?

Traffic studies are not part of the scope of this project.

2. Does the scope of work include the alterations of intersections, including but not limited to the addition of light signals?

The engineering and design phase of this project will assess if alterations to intersections are required however we do not anticipate the need for light signals.

3. Does the scope of work include the alterations of the roadway cross-sections, including but limited to the number of lanes, changes to sidewalks, and/or changes to Boulevards?

The engineering and design phase of this project will assess if alterations to sidewalks and roadways are required. We do not anticipate the need for added lanes for this section of road.

4. Please confirm the anticipated timeline for the Feasibility Study and design submittals (60%, 90%, and 100%)?

The anticipated timeline for completion will be

60% - **August 2025**

90 % **October 2025**

100% **December 2025**

5. Is there an estimated construction budget for the project? If so, could it be provided?

There is no estimated construction budget as the project limits must be established first. The successful bidder will provide a cost estimate upon completion of the feasibility and engineering design.

6. Please confirm whether utility investigations are included in the proposed scope of work, if so please confirm the quality level (A, B, C, or D)?

Utility investigations/coordination would be required at a level B.

7. Please confirm whether there are any existing geotechnical and hydrogeological studies that can be shared to support bidding. Also, please confirm if the geotechnical study (to be undertaken by the Township) will include hydrogeological considerations.

There are no known geotechnical or hydrogeological studies that have been completed on Dundas Street West. Geo Technical investigations will not include hydrogeological considerations.

8. Please confirm whether the scope of work is to include any of the following:
- a) Municipal Class Environmental Assessment, if so what Schedule? **No, not anticipated.**
 - b) Environmental Impact Study (i.e. Natural Heritage) **No, not anticipated.**
 - c) Tree Protection and/or Inventory Study **No, not anticipated.**

9. Should the project result in the generation of excess soil, and an excess soil management plan (ESMP) is required, will the proponent be responsible for preparing the ESMP?

The scope of this project does not include an ESMP plan.

10. Is there an existing up-to-date topographic and legal survey available? Or are proponents required to carry costs associated with these surveys by an Ontario Land Surveyor?

There are no existing or up to date topographic and legal surveys available. The proponents will be required to include this in their pricing.

11. To further clarify topographic and legal survey requirements please confirm where topographic and legal survey are required throughout the entire project area or just the area identified in Addendum 2?

The anticipated scope of the project will be from Dundas/Bridge Street to Dundas/County Road 2 and the area identified in Addendum # 2 for resurfacing. The results of the feasibility study will determine the final project limits.

12. Please confirm the required scope of work as it relates to stormwater management. Will the successful proponent be responsible for any or all of the following: stormwater quantity control and quality control?

The assessment of the stormwater infrastructure through CCTV inspections and establishing the catchment zones will determine the final scope of the project. This may include stormwater quality and quantity control if required.

13. Are there existing stormwater outlets (which are to be reused) or is it anticipated that new outlets will be required?

It is anticipated that existing stormwater outlets will be reused.

14. Does the Township have catchment maps for the existing sanitary and/or storm systems? If so, could they be provided?

There are no catchment maps for the existing storm systems on Dundas Street West. The sanitary atlas, which was provided in this RFP is all the available information.

15. Please confirm if the required scope of work includes hydraulic grade line (HGL) analysis associated with the proposed sanitary and stormwater works? This may be required to assess risk of surcharging lateral connections and basement backups.

The scope of this project doesn't include a hydraulic grade line analysis.

16. Does the scope of work include the development of a construction phasing plan and/or traffic management plan?

The scope of this project doesn't include the development of a construction plan and/or traffic management plan. This may be required as part of the construction tendering.

17. Does the scope of work include the development of an illumination plan and/or an assessment on the suitability of existing lighting systems?

The scope of this project doesn't include the development of an illumination plan and/or light systems.

18. Are the existing utility polls to be relocated outside of the asphalt roadway or are they to remain in-situ?

It is anticipated the hydro poles will remain in-situ.

19. The scope of work notes "Utility Coordination", can the Township please elaborate on this item? For instance, whether the proponent will be the primary source of coordination with utility providers and whether the proponent will be responsible for coordination of any relocations required to enable the proposed municipal works?

The proponent will be responsible for coordinating locates and re-locates with utility providers through Ontario One Call or as deemed necessary by the proponent.

20. Is the Township aware of any buried major third-party utility infrastructure (i.e. gas, bell, hydro, etc.) in the project corridor?

**High pressure gas mains
High Voltage electrical vault.**

The deadline to submit questions will be Friday March 28, 2025 at 4:00 p.m. If applicable, a final addendum will be issued on Tuesday April 2nd, 2025. Questions that have been answered in previous addendums will not be re-answered.

END OF ADDENDUM
