Skyview 2 Battery Energy Storage Project

Project Update · Issue 1 · May 2026

Upcoming Deliveries & Delivery Routes

Deliveries of major Project components are starting to arrive on-site in **June 2026** and will continue throughout the summer.

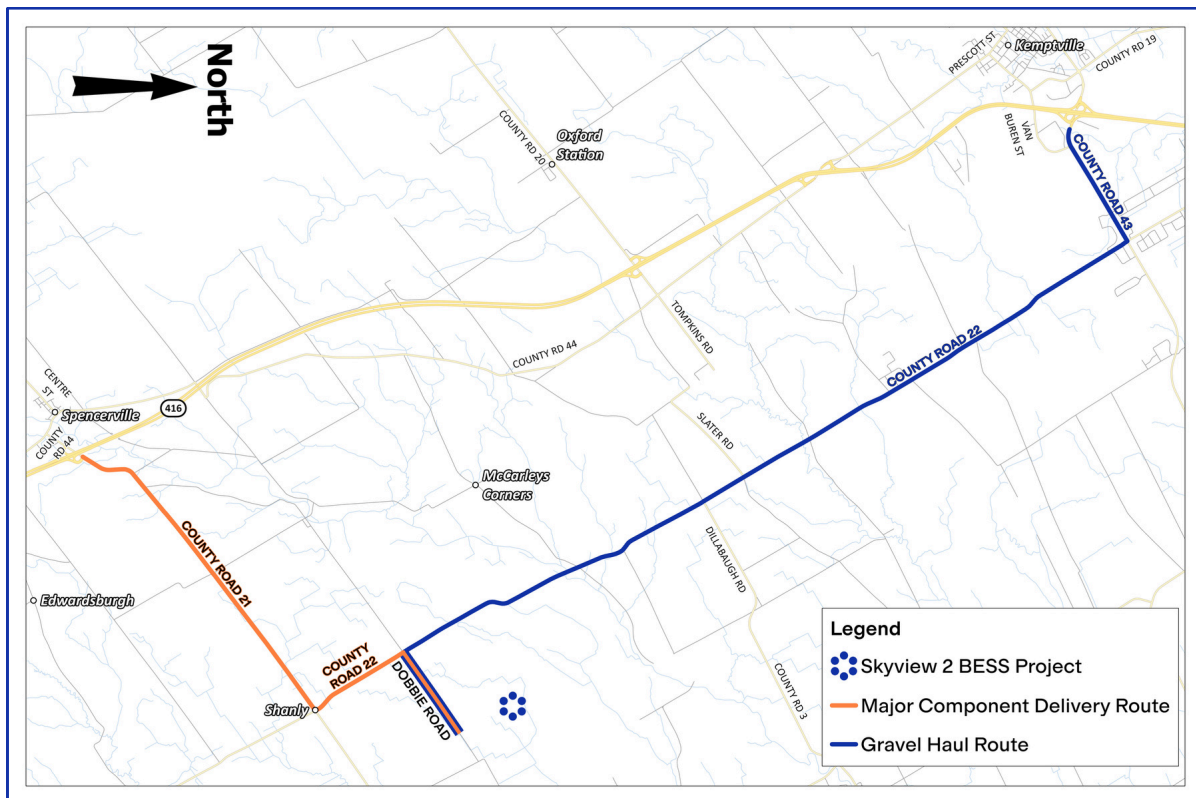

- Battery Energy Storage System (BESS) units
- Power conversion systems
- Auxiliary power transformers
- Main power transformers

Large and oversized transport vehicles will be used for the major Project component deliveries, and they will follow the route of: **Highway 416 → County Road 21 → County Road 22 → Dobbie Road**. As approximately 400 BESS units are expected to arrive onsite between **June and September**, residents can expect an increase in truck traffic throughout the delivery period.

Delivery hours are expected to be between **7:00 a.m. and 3:00 p.m., Monday to Friday**. Occasional weekend deliveries may also occur when required. Delivery trucks will not have prolonged stoppages along municipal roadways.

Hauling of granular material from Kemptville Quarry to the Project site is expected to occur between **May 28 and August 24, 2026**, using the same haul route as the major project components. Please note that schedule dates beyond **June 30** remain tentative and may shift.

Road Safety

Road safety continues to be an important topic of discussion between the Project team, contractors, and the Township.

Additional road signage is expected to be installed ahead of the primary delivery period, and contractors have been reminded of expectations regarding safe driving practices, adherence to posted speed limits, and respectful conduct while travelling through the community.

The Project team will continue working with contractors and municipal representatives throughout the construction period to help support safe road use and ongoing communication with residents.

2nd CLC Meeting Recap

The second Community Liaison Committee (CLC) meeting took place on April 9, 2026, at the Township Hall in Spencerville and online via Zoom.

Meeting notes and the presentation from the second CLC meeting are now available on the Project website and the Township website:

- <https://www.potentiarenewables.com/our-portfolio/skyview-2-battery-energy-storage-project/>
- <https://www.twpec.ca/news/posts/skyview-2-battery-energy-storage-system/>

The third CLC meeting is planned for the evening of **Wednesday, July 22, 2026**. The exact time and location will be announced in **June**.
