## Community Notice: Material Hauling During Township Half-Load Restriction Period

Hello neighbours,

We'd like to share an update about the ongoing hauling activities to the Project site during the Township's half-load restriction period. You can expect increased truck traffic on County Road 43, County Road 22, and Dobbie Road, as gravel hauling to the Project site continues. We've included a map at the end of this letter that shows the haul routes.

Hauling of construction materials started on March 25 and is expected to continue into May. Trucks will be operating daily, Monday to Friday, and possibly on Saturdays if necessary. Only gravel will be delivered during this haul period and delivery of battery components and major equipment are scheduled to begin in June.

Although hauling materials during the half-load restriction period (March 1 to April 30) was not originally planned, challenging weather conditions slowed down the winter hauling, and therefore we need to continue deliveries to keep the Project construction on schedule. Our construction contractors have adjusted truck loads to comply with the half-load restrictions and protect the roads during this time, including reducing the volume per truck and ensuring loads do not exceed 5,000 lbs per axle, as required by the Highway Traffic Act. We have also reminded our contractors about the Township's half-load requirements, road safety, and the importance of following speed limits.

We truly appreciate your patience and understanding as hauling continues. If there are any additional changes from our construction contractors, we'll do our best to notify you as soon as possible. We will also share more updates about this and other construction activities at the upcoming Community Liaison Committee (CLC) meeting on April 9. Details about the meeting can be found below:

**Thursday, April 9, 2026**

**6:00 PM – 7:30 PM**

**Township Hall (Municipal Building)**

**18 Centre St. Spencerville, ON K0E 1X0**

If you're unable to attend in person, you can join and observe virtually through the meeting's
